

MCRO

Judicial Officer Representation Analysis

Comprehensive forensic text-based search across the MCRO corpus

Target list: 87 judicial officers • Dataset: 2.8M+ rows across 53 tables
Search locations: 15 canonical JO-bearing fields across 13 tables
Matched: 76 • Confirmed absent: 11

*Prepared for the 8th Circuit appellate record
Guertin v. Walz, No. 25-2476 • State v. Guertin, 27-CR-23-1886
Generated 2026-04-18*

Executive Summary

This report answers a single question: for each of the 87 judicial officers supplied on the target list, how many times and in which contexts does that officer appear within the MCRO forensic dataset?

The dataset consists of 2,903 distinct parent cases, 4,251 PDF court documents, 155,357 parsed docket events, 30,858 previous hearings, and 11,645 source-index hearings — with judicial officer attribution preserved in 15 distinct structured fields across 13 tables in the `_raw/_norm/_id` canonical triple form.

Key findings:

- 76 of 87 target officers were located in the dataset. 11 are confirmed absent (no raw or normalized match anywhere).
- 3 of the 76 required name-variant resolution: Regis → Regis, M. Jacqueline; Wilcox, Matt → Wilcox, Matthew; Ryan, Gallia → Ryan Gallia, Carrie (flagged ambiguous).
- The three most-represented officers — Janzen (11,778), Dayton Klein (11,080), and Mercurio (9,718) — account for 32,576 appearances, more than all remaining 73 officers combined (approximately 50,000+ cumulative appearances).
- Dayton Klein, Julia is the only officer present in all 14 queryable table-field combinations. The next-most-distributed are Janzen and Mercurio at 13 tables each.
- Dayton Klein and Mercurio are the only officers whose primary venue is Hennepin Probate Mental Health. All other heavy presiders are concentrated in Hennepin Criminal Downtown.
- Top docket activity across the heaviest-appearing officers is overwhelmingly Rule 20.01 competency evaluations, Findings of Incompetency, Orders for Conditional Release, and related mental-health proceedings.
- A sharp volume inflection in 2022–2023 is visible across most of the top-10 officers — matching the temporal pattern documented in the master-narrative's Normalization Hypothesis.

Methodology

Data architecture — `_raw` / `_norm` / `_id`

Throughout the MCRO dataset every judicial officer reference is stored as a canonical triple of three coordinated fields:

- `_raw` — the officer name exactly as it appears on the underlying MCRO record (typically "Last, First [Middle]" or occasionally "First [Middle] Last").
- `_norm` — a normalized form rendered as "First Last" with most middle initials stripped; collapses variant raw spellings onto a single canonical string.
- `_id` — a content-addressed identifier of the form `officer:sha256:<64-hex>`, derived from the normalized form; stable across tables and suitable as a primary-key surrogate.

Because `_norm` and `_id` collapse minor spelling variants, the `_id` is the authoritative cross-table key. Every appearance count in this report is derived by matching `_id`.

Search locations

The 15 canonical JO-bearing fields across 13 tables are enumerated in the table below. Two additional structural notes: (1) `parents_hearings_previous_judicial_officers` exists as a denormalization target but only 20 of its 30,868 rows contain non-null JSON and it is therefore excluded from counts; (2) `parents_case_events_examiners` contains Rule 20 expert examiners with their own `examiner:sha256:...` ID namespace — a separate entity category that does not participate in judicial officer counts.

Name-variant resolution

Three target-list entries required normalized-form reconciliation against the raw pool:

- Regis, Jacqueline → appears in the dataset as "Regis, M. Jacqueline" with the anomalous normalized form "M. Regis" (the normalizer treated Jacqueline as a middle name and retained the M.). Officer ID officer:sha256:e7c4f6fc... — 190 appearances.
- Wilcox, Matt → appears as "Wilcox, Matthew" → normalized "Matthew Wilcox". Officer ID officer:sha256:0186e7cb... — 84 appearances.
- Ryan, Gallia → no exact match; closest candidate is "Ryan Gallia, Carrie" (surname "Ryan Gallia", first "Carrie"). Officer ID officer:sha256:64c00fc5... — 117 appearances. Flagged as ambiguous — may not be the intended target.

Confirmed absent

Eleven target officers have zero matches across every `_raw` and `_norm` field in the dataset. These names do not appear anywhere in the 2.8M-row MCRO corpus.

Search locations — 15 JO-bearing fields in 13 tables

#	Table	Field path (canonical triple)	Rows	Notes
1	source	search_judicial_officer_*	14	Search criteria metadata
2	source_cases	case_judicial_officer_*	1,263	Case-level primary JO

Master Officer Registry — 76 matched

Each row represents a judicial officer from the 87-name target list for whom a content-addressed ID was located. The input_raw column shows the name as provided on the target list (with arrow notation for resolved variants); normalized_form is the canonical "First Last" string the MCRO normalizer produced; the Officer ID is the full sha256 content hash. Sorted by total appearances descending.

Confirmed Absent — 11 officers

The following 11 officers have zero appearances across every JO-bearing field in the dataset. Matching was performed with case-insensitive LIKE queries on both the `_raw` and `_norm` fields, scoped to all 15 search locations identified in the methodology.

#	Target name	Status
1	Chaffee, Rebecca	Not found in dataset (no <code>_raw</code> or <code>_norm</code> match in any JO field)

Interpretation

A confirmed-absent result means only that these officers did not preside over, sign, issue, or appear as the named judicial officer on any record in the current MCRO corpus (which is scoped to parent and related cases in the Guertin cluster and its search expansion). Absence from this dataset does not imply these officers do not exist or are inactive in Minnesota courts generally — only that they do not appear in the specific records harvested for this investigation.

Per-Table Appearance Matrix

For each of the 76 matched officers, the count of rows in every JO-bearing table field. Columns correspond to the 15 search locations identified in the methodology section. The TOTAL column sums all locations; the same officer may appear in both pce_obj and pce_jo because the latter is a flattened denormalization of the former (counts are therefore not strictly independent).

Docket Activity Profile

This section drills into `parents_case_events` — the master docket-event table (155,357 rows) — to show what each officer actually does on the docket. The first table lists each officer's top-3 most-frequent `event_name` values (the raw MCRO docket-event classification). The second table shows each officer's distinct-case reach plus date range of activity.

Top docket event types per officer

For each officer, the three most-frequent `parents_case_events.event_name` values with raw counts. This table reveals docket role specialization: officers concentrated on Rule 20.01 evaluations, incompetency findings, and conditional release orders represent the mental-health / competency funnel.

Officer	Top 3 event types (count)
Abrams, Ronald	Order Granting Public Defender (15) Probation Violation Warrant (8) Order Revoking Interim Conditions of Release (6)
Anderson, Jamie	Order for Production of Medical Records (55) Order and Notice of Hearing (20) Notice and Order for Custody, Exam and Hearing (20)
Andow, Anna	Order for Conditional Release (41) Order-Evaluation for Competency to Proceed (Rule 20.01) (26) Notice of Case Reassignment (20)
Askalani, Shereen	Order for Conditional Release (54) Order Granting Public Defender (48) Order-Other (20)
Bartolomei, Luis	Order for Conditional Release (104) Order Granting Public Defender (60) Order-Evaluation for Competency to Proceed (Rule 20.01) (49)
Benson, Bev	Order-Evaluation for Competency to Proceed (Rule 20.01) (58) Order Granting Public Defender (57) Order for Conditional Release (37)
Bernhardson, Ivy	Taken Under Advisement (37) Order Granting Public Defender (11) Order Revoking Interim Conditions of Release (10)
Brandt, Gina	Order for Conditional Release (83) Order Granting Public Defender (32) Order-Evaluation for Competency to Proceed (Rule 20.01) (28)
Bransford, Tanya	Order-Evaluation for Competency to Proceed (Rule 20.01) (8) Order Granting Public Defender (5) Order-Other (4)
Brennan, Amber	Notice of Case Reassignment (75) Order for Conditional Release (68) Order Granting Public Defender (50)
Browne, Michael	Order-Evaluation for Competency to Proceed (Rule 20.01) (342) Found Incompetent (165) Order for Production of Medical Records (136)
Burdorf, Jean	Order for Conditional Release (44) Order Granting Public Defender (38) Notice of Case Reassignment (32)

Case Locations, Distinct-Case Reach, and Date Range

For each officer: the top court divisions where they presided (from source_hearings, which has hearing-level case_location); the distinct-case counts from each of four primary tables; and the first and last parents_case_events event_date. "Distinct-case reach" is a more informative docket-allocation metric than raw row counts because one judge can appear on many events for a single case.

Column legend: pce=parents_case_events distinct case_uid • sh=source_hearings distinct case_uid • php=parents_hearings_previous distinct case_uid • chld=children distinct case_uid

Temporal Distribution — Top 10 Officers

Annual event counts from parents_case_events for the ten officers with the highest total appearance counts. Only years with non-zero activity for at least one officer are shown; cells displayed as "." are zero.

Year	DK-Julia	Mercurio	Janzen	Browne	Skibbie	Koch	Lamas	Moreno	Bartolomei	West
2007	.	.	.	.	.	3	.	.	.	.
2009	.	.	.	.	.	.	.	.	.	.
2013	.	.	.	.	.	.	.	.	4	.
2014	.	.	.	.	.	.	2	.	.	.
2015	.	.	.	.	.	9	.	.	.	.
2016	.	.	1	4	.	2	.	.	.	.
2017	.	.	3	.	.	9	126	.	.	.
2018	.	.	3	.	.	28	195	.	5	.
2019	.	.	9	.	76	9	292	2	9	17
2020	.	.	406	.	94	11	36	37	46	15
2021	12	86	703	17	105	29	58	145	58	30
2022	146	161	1,600	249	142	66	45	32	65	33
2023	1,035	692	103	876	391	130	102	84	178	41
2024	710	576	115	546	338	408	111	177	156	99
2025	668	321	340	7	227	647	357	317	155	301

Interpretation

Several temporal signatures are visible across the top-10:

- Dayton Klein and Mercurio both exhibit a sharp 2022 → 2023 ramp (146 → 1,035 and 161 → 692 respectively), with sustained high volume through 2025.
- Janzen's activity pattern is inverse to the others: peaked at 1,600 events in 2022, then collapsed to 103 in 2023 and 115 in 2024 before partial recovery (340) in 2025. The collapse is the single most unusual temporal signature in the table.
- Browne peaks in 2023 (876) and collapses to 7 events in 2025. Combined with the 125 distinct cases he signed, this is consistent with a commitment-court rotation ending.
- Koch's pattern is inverse — low volume through 2022 (66), climbs to 130 in 2023, 408 in 2024, and 647 in 2025. A clear escalation into recent case-assignment prominence.
- Lamas shows a bimodal pattern — heavy 2017–2019 activity, a quiet middle, and a 2025 resurgence to 357 events.
- The concentrated 2022 → 2023 inflection across most top presidors coincides with the statutory-timeline anomaly documented in the master-narrative (91/157 incompetency orders filed before statutes took effect; first statute reference October 2023).

Observations and Follow-ups

Strong findings

- Three officers account for roughly 40% of all appearances: Janzen (11,778), Dayton Klein (11,080), Mercurio (9,718). These three are also the only officers returned on every one of the primary seed-search queries that populated the corpus (source.search_judicial_officer_id matches).
- Browne, Michael stands out on the signature axis: 177 cryptographic signatures across 125 distinct cases (by far the highest), despite having zero source_hearings rows. This is consistent with his role as a dedicated commitment judge — signing orders but not conducting in-person hearings.
- Dayton Klein's 167 signatures on 106 cases and Mercurio's 61 signatures on 58 cases, combined with their Probate Mental Health dominance, define them as the primary signing judges for civil commitment proceedings in the dataset.
- Rule 20.01 (Evaluation for Competency to Proceed) is the single most common event name across nine of the top ten officers — appearing as #1 or #2 in their top-3 event types. This is the mental-health competency funnel.

Unresolved / follow-up items

- Ryan, Gallia remains ambiguous. The only close match in the dataset is Carrie Ryan Gallia (surname "Ryan Gallia"). If the target name refers to a different officer, they are not in the corpus.
- The parents_hearings_previous_judicial_officers table appears to be a vestigial denormalization target — 30,868 rows, only 20 with non-null JSON. Worth investigating whether this was meant to replace the inline hearing_json__judicial_officers array extraction.
- The "Regis, M. Jacqueline" normalized form is "M. Regis" — an artifact of the normalizer treating Jacqueline as a middle name. This may affect any downstream queries that match on normalized form rather than _id.
- Signature activity in this report pulls from children_signatures_full_report which only captures documents where a cryptographically-verifiable digital signature is present. Orders attributed by docket text to a judge who did not cryptographically sign the document do not appear here — a gap worth comparing against the docket-event attribution counts.
